Hyderabad, India | +91-9398008558 | nandrushyam2613@gmail.com | linkedin.com/in/nandru-shyam-0080265c0 | github.com/shyam-analytics

PROFESSIONAL SUMMARY

Motivated B.Tech Computer Science student with strong expertise in Python, SQL, PostgreSQL, Power BI, and Advanced Excel. Hands-on experience in customer segmentation, RFM analysis, KPI calculation, SQL analytics, data-quality validation, and interactive business intelligence dashboards. Experienced in applying CTEs, JOINS, subqueries, window functions, CASE statements, and materialized views to solve practical business problems. Built analytics projects across credit card transactions, e-commerce customers, HR workforce data, sales performance, and student analytics. Seeking an entry-level Data Analyst position to leverage analytical and problem-solving skills to derive actionable business insights and support data-informed decision-making.

TECHNICAL SKILLS

Data Analysis & BI:	Power BI (DAX, Power Query), Microsoft Excel (XLOOKUP/VLOOKUP, Dynamic Pivot Tables, Dynamic Charts, Slicers, Data Cleaning)
Languages & Databases:	Python, SQL, PostgreSQL
Analytics & Techniques:	RFM Analysis, Customer Segmentation, KPI Calculation, Exploratory Data Analysis (EDA), Basic Statistics
Database Concepts:	Complex CTEs, JOINS, Subqueries, Window Functions, Materialized Views
Tools & IDEs:	VS Code, DBeaver, GitHub
Core CS Subjects:	Data Structures & Algorithms (DSA), Operating Systems, DBMS, Computer Networks, OOPs

TECHNICAL PROJECTS

Credit Card Transaction Analytics | [GitHub Repository](#) | [PostgreSQL, SQL, Power BI](#)

- Analyzed 100,000 credit card transactions worth ₹4.35B across 10,000 customers, 15,000 cards, 2,000 merchants, and 250 branches.
- Evaluated transaction status (66.74% approved, 16,552 declined, 16,712 reversed) across card networks, payment modes, branches, and geographic levels using PostgreSQL.
- Analyzed customer behavior and merchant spending patterns to identify transaction trends across payment modes, card networks, branches, and geographic levels.
- Engineered advanced SQL queries applying CTEs, JOINS, subqueries, window functions, CASE statements, and views to derive actionable insights.
- Developed a 5-page interactive Power BI dashboard featuring 18 KPI cards and 25 visualizations covering customer behavior and merchant spending trends.

E-Commerce & Customer Analytics | [GitHub Repository](#) | [PostgreSQL, SQL, Power BI](#)

- Processed and analyzed 50,000+ customer orders using PostgreSQL to evaluate revenue, cancellations, returns, payment preferences, and product categories.
- Performed RFM (Recency, Frequency, Monetary) analysis to segment customers into high-value and churn-risk categories and support customer-focused analysis.
- Engineered complex SQL queries leveraging CTEs, Window Functions, and CASE statements to calculate core business KPIs and analyze customer and product performance.
- Built a 3-page interactive Power BI dashboard covering executive sales, customer analytics, product performance, and geographic analysis.
- Optimized repetitive analytical queries by building Materialized Views and implementing data-quality validation checks.

HR & Employee Analytics | [SQL, PostgreSQL, Power BI](#)

- Analyzed employee and HR data to explore workforce composition, job categories, employee counts, compensation-related metrics, and organizational trends.
- Examined employee distribution across job categories and developed practical workforce KPIs for HR-focused analysis.
- Applied SQL JOINS, aggregations, GROUP BY, CASE statements, CTEs, and window functions to answer practical HR business questions.
- Compared employee counts and key metrics across job categories to identify workforce patterns and support management reporting.
- Used SQL-based analysis to organize employee-level data into meaningful HR summaries and dashboard-ready datasets.
- Developed an interactive Power BI dashboard to present employee KPIs, job-category analysis, workforce distribution, and organizational insights.
- Created clear visual reporting to help users explore employee metrics and identify trends across the workforce.

Sales Data Analysis Dashboard | [Microsoft Excel](#)

- Cleaned and structured raw sales datasets to evaluate top-performing products and monthly sales trends.
- Developed an interactive Excel dashboard using dynamic Pivot Tables, Slicers, and custom charts to deliver clear visual KPIs for business performance.

Student Performance Analytics | [Microsoft Excel](#)

- Designed an automated student grading system leveraging advanced Excel formulas (IF, LOOKUP, VLOOKUP).
- Created visual performance reports and distribution charts to assist in evaluating overall class performance trends.

EDUCATION

- B.Tech in Computer Science & Engineering – Guru Nanak Institute of Technology, Hyderabad | CGPA: 7.42
- Intermediate (Class XII) – TSWREIS Junior College, Annapureddypally | Score: 86.4% (864 / 1000)
- Secondary School Certificate (Class X) – TSWREIS School, Annapureddypally | CGPA: 9.2

CERTIFICATIONS & JOB SIMULATIONS

- HackerRank: SQL (Advanced), SQL (Intermediate)
- Forage: Data Analytics Job Simulation – Tata (Aug 2026), GenAI Powered Data Analytics Job Simulation – Deloitte (May 2026)
- Simplilearn SkillUp: Data Analytics Job Simulation (Aug 2026), Introduction to SQL (Sep 2026)
- Skill India Digital / Reliance Foundation: Introduction to Data Analytics & Python for Data Science (Aug 2026)

KEY HIGHLIGHTS & INTERESTS

- Core Strengths: Algorithmic Problem Solving (DSA), Analytical Thinking, Self-Motivated Learner
- Interests: Technical Blogging, Exploring New Technologies & Coding Challenges, Cricket
